

Michelle Leafloor

Michelle Leafloor is the Director HIS and Clinical Solutions Delivery within the Information Services Department of The Ottawa Hospital. With over 20 years of experience in progressively responsible roles in healthcare, Michelle has been with The Ottawa Hospital for 17 years and previously worked at CHEO and the Centretown Community Health Center.

As Director Michelle has accountability for corporate clinical information systems delivery and associated change management. Her team of project managers, clinical and business analysts, trainers and support staff are instrumental in facilitating implementations which are foundational to The Ottawa Hospitals journey to Top 10 in Patient Safety and Quality. In addition Michelle has been involved in many regional and multi-LHIN initiatives such as the DI-r repository and other LHIN-eHealth partner projects.

Currently Michelle's primary focus is as the Program Director for the new Hospital Information System procurement and implementation within TOH and across six current regional partners.

Michelle is a graduate of the University of Ottawa Master in Health Administration Program and has undergraduate Commerce and Economics degrees.

Michelle has been married to her husband Randy for over 28 years and has two great sons, Jordan, an avid football player who also works at a local hospital and Cameron who is just finishing his 3rd year of Medical School. Outside of family and work Michelle herself is an avid athlete who can be found training in the gym or competing on the football field herself.
