

TELFER EXECUTIVE PROGRAMS

LEAN LEADERSHIP PROGRAM

The Lean Leadership Program provides leaders a unique opportunity to learn how to apply advanced leadership thinking from a Lean perspective on their day to day work, to create and sustain breakthrough improvements as well as ongoing habits of continuous improvement. The program is focused on developing the knowledge and skills of leaders as they either lead a Lean transformation, or simply apply their learnings to increase their personal and team effectiveness.

PROGRAM TAKEAWAYS

- Understand your leadership role in a Lean transformation, and create your own “Leader Standard Work”, or set of regular, simple, behaviours to create and sustain continuous improvement in your organization
- Understand the critical success factors of Lean transformations and know how to tangibly apply these principles to make continuous improvement a natural part of life in your area of responsibility
- Create improved alignment and free up your team’s capacity to make improvements by applying the principles of Lean strategic planning
- A tangible, specific, and practical plan to get started implementing workshop topics directly into your own work

WHAT YOU WILL LEARN

- Your role as a leader of a Lean transformation
- Lean tools and systems that you, as a leader, can use to create and sustain both initial breakthrough improvement and continuous improvement
- Lean thinking (mindsets, habits and leadership styles) for leaders
- Prioritization and planning for the team as well as for yourself
- How to recognize “wastes” or non-value activities that you, as a leader, control directly and how to free up capacity by eliminating these wastes

WHO SHOULD ATTEND

Leaders (Senior Manager to ADM) who:

- Wish to start or strengthen a Lean transformation in their areas of responsibility, or
- Wish to learn more about how they, as leaders, can apply Lean thinking to increase their own leadership and team effectiveness, even if they are not planning a formal Lean transformation
- Are from the public sector, not-for-profit organizations, crown corporations, or government departments and agencies
