

## Master of Science: Health Systems Internship Learning Objectives

**Student:**

**Research Mentor:**

**Location:**

Competency or specific skills	Acquired competency or specific skill goals to be learned during the Research Internship
<p>1. Understanding of the importance of system’s thinking and a system’s approach to the analysis of health care issues.</p>	
<p>2. Ability to effectively carry out research including:</p> <ul style="list-style-type: none"> <li>a) Ability to synthesize and critically evaluate information produced by other researchers.</li> <li>b) Ability to frame researchable questions and to formulate hypotheses.</li> <li>c) Ability to effectively select from, integrate, and apply a range of conceptual frameworks and research methods drawn from different disciplines.</li> <li>d) Ability to select from and apply a variety of analytic approaches that match the research question(s) and context.</li> <li>e) Ability to work in an interdisciplinary research team.</li> <li>f) Awareness of ethical issues relating to all aspects of the research process.</li> </ul>	<p>This section should include information regarding what research question you are trying to answer. What methodologies will be used etc...</p>
<p>3. Understanding of the issues of security and privacy and their impact on conducting health systems research.</p>	

<p>4. Understanding of the issues of knowledge production, translation, and uptake, including the social, economic, political and ethical factors that influence knowledge production; and, the diverse assumptions embedded in knowledge production.</p>	
<p>5. Ability to effectively communicate research results research.</p>
